Additional Information / Prior Funding History:

None.

Project Description/Justification:

This project will correct deficiencies identified in the Airport Master Plan including: 1) the apron and airport access road do not meet Federal Aviation Administration (FAA) setback requirements; 2) the runway ends have settled from permafrost thawing and have become soft due to poor drainage; 3) there are no runway, taxiway or apron lights or navigational aids and; 4) the snow removal equipment building is in poor condition, unheated and penetrates the transitional surface of the FAA required obstruction free zone.
